PROFESSIONAL PROFILE

I work across data analytics, artificial intelligence, IT systems, and automation to solve technical problems, analyze information, improve digital workflows, and support better decision-making. I clean and validate data, prepare reports and dashboards, support Windows workstations and users, and build tested workflows with Python, SQL, JavaScript, web technologies, and reviewed AI-assisted processes.

CORE CAPABILITIES

Data Analytics: SQL, Excel, Google Sheets, data cleaning and validation, reporting, dashboards, data visualization, data interpretation, KoBoToolbox, and ODK.

Artificial Intelligence: Generative AI, large language models, structured prompting, AI-assisted analysis, structured outputs, claim validation, human review, and deterministic fallback.

IT Systems: Windows, hardware and software troubleshooting, workstation setup, common networking and connectivity, printers and shared resources, user support, and IT documentation.

Automation and Programming: Python, APIs, workflow automation, data processing, reporting automation, JavaScript, HTML/CSS, Git/GitHub, responsive web programming, and UX.

PROFESSIONAL EXPERIENCE

IT Support Technician & Digital Services Assistant

Cybercafé & Printing Center SMITH | Goma, DR Congo | December 2025 - Present

- Provide technical support for computers, printers, Internet access, and office applications.
- Install, configure, and maintain Windows, drivers, antivirus tools, and productivity software.
- Troubleshoot hardware, software, connectivity, printing, and scanning issues, and assist users with digital documents and online services.

Field Data Enumerator & Technical Support

CAAP TUJITEGEMEE, NGO | Goma, DR Congo | July 2025 - November 2025

- Collected digital field data using KoBoToolbox and ODK.
- Configured mobile devices, supported field teams, and troubleshooted field connectivity and device issues.
- Cleaned and validated collected data and supported supervisors with reporting and data-quality checks.

IT Support & Data Assistant

HIGH TECH BUSINESS | Goma, DR Congo | March 2025 - July 2025

- Installed and configured computers, printers, and business software.
- Resolved hardware and software issues and supported daily technical operations.
- Cleaned, organized, and analyzed data with Excel and Google Sheets, and prepared reports and dashboards to support decision-making.

PROFESSIONAL EXPERIENCE - CONTINUED

IT & Administrative Assistant

Cybercafé KivuNet | Goma, DR Congo | June 2024 - April 2025

- Provided daily IT support and customer service for computer users.
- Maintained Windows and other software and troubleshoot Internet, printing, scanning, and workstation issues.
- Assisted users with online services and supported file organization, administrative work, and document preparation.

SELECTED PROJECT EVIDENCE

AI-Assisted Data Quality & Reporting Workflow

- Implemented a reproducible Python and SQL workflow for 900 synthetic operational records, with ordered validation, transactional SQLite loading, and reconciled metrics: 840 accepted records, 60 rejected records, and 66 defect events.
- Produced deterministic JSON, ten-sheet Excel, HTML, and five-chart outputs; constrained optional AI drafting with structured-response and claim validation, human review, rejection controls, and deterministic fallback.
- Scope: synthetic portfolio project; not a client deployment or autonomous AI decision system.

Data Cleaning & Reporting

- Documented a controlled process for cleaning, validating, interpreting, and communicating data, with a reproducible sample, explicit decisions, validation checks, and reporting limits.

Workstation Setup & Troubleshooting

- Published a representative eight-stage support workflow covering intake, diagnosis, safe intervention, verification, documentation, and user handoff for workstation and connectivity issues.

Bilingual Portfolio Platform

- Designed and maintain a bilingual responsive website using HTML, CSS, and JavaScript, with accessible interactions, contact-service integration, SEO, performance controls, Git-based delivery, and repeatable release checks.

VERIFIED PROFESSIONAL CREDENTIALS

- [Microsoft IT Support Specialist Professional Certificate](#) - Microsoft, via Coursera | Completed September 8, 2026
- [Google IT Support Professional Certificate](#) - Google | Completed April 1, 2026
- [Google Data Analytics Professional Certificate](#) - Google | Completed February 22, 2026
- [Python for Everybody](#) - University of Michigan | Completed December 15, 2025

EDUCATION

Bachelor of Science in Computer Science

University of the People | Online | Expected April 2027

State Diploma in General Pedagogy - 2024

École d'Application du Cepromad | Goma, DR Congo

LANGUAGES AND WORKING ARRANGEMENTS

French - Very good | English - Very good | Available for remote and on-site opportunities
